

## Front End Developer

Are you a motivated front end developer with Google Maps and JS experience?

Looking for a short term contract with flexible working hours and days?

Great opportunity to work remotely and improve a web application for the resources sector

**Summary** The Advitech Group is seeking an experienced Front End Developer with strong skills in Javascript, JQuery, HTML and CSS. The ideal candidate will have experience with GoogleMaps JavaScript API and be able to work independently and remotely. This short term contact position will require weekly meetings in our Brisbane Office. If you are a motivated person with at least two years' experience working as a front end developer, this role may be for you.

**The Role** The role will involve working in a small distributed Development Team, designing and implementing UI improvements to an existing web application that delivers telemetry solutions to the mining industry. The project will require 2-3 days work per week over a 10-12 week period.

**About You** To be successful, you will possess the following:

- Minimum 2 years' experience as a front end developer
- Expert in Javascript, JQuery, HTML, CSS and JSON
- Experience working with the Google Maps JavaScript API
- Understanding of media queries to achieve responsive styling, for desktop and mobile devices
- Proven ability to work remotely and achieve milestones
- Demonstrated time management skills

**Desirable** The following additional skills would be advantageous:

- Knowledge of the JavaScript libraries underscore, backbone or similar

**Position** Short term contract (10-12 weeks) with possibility of ongoing work

**Salary** Attractive hourly rate to suit experience

**Location** Brisbane
