Projects Engineer (Mechanical)

Ref # 2017_H01
11 September 2017

Growing specialist manufacturing firm

Rewarding work across a wide variety of industries

Great professional development opportunities across the Advitech Group

Summary

Hushpak Engineering is seeking a projects engineer with strong technical skills and practical experience, who wants to develop their career within a small but rapidly growing organisation. The successful candidate will work with our strong and diverse client portfolio and capitalise on new business opportunities in mining, manufacturing and other industries. This role will suit someone who is keen to move into a senior role and pursue a potential management opportunity.

The Role

The role will involve the following key activities:

- Assisting with the development of solutions to challenging noise and vibration problems in an industrial or mining context
- Coordination of acoustic design and construction projects
- Interacting with customers to assess and understand their needs, resulting in successful project delivery
- Practical, hands on involvement in design, procurement and installation
- Performance of acoustic testing and report preparation
- Preparation of high quality tenders and technical reports

Essential

To be successful, you will possess the following:

- Degree in Mechanical Engineering or equivalent and the willingness to undertake training in acoustics as necessary
- At least 7 years of experience, preferably in design, project management, contracts and site work
- Solid skills in engineering investigations and problem resolution
- Demonstrated practical background in engineering
- Demonstrated experience in management of project budgets
- Excellent oral and written communication skills
- Ability to manage customer relationships
- Current drivers licence

Position

Permanent Full Time

Reports to

Operations Manager

Location

Hushpak Engineering Workshop, Unit 1/3 Pippita Close, Beresfield (Newcastle)
